F&C UK Mid Cap Fund

Share Class: C Acc, a Fund of F&C Investment Funds ICVC (ISIN GB00B60SFN31).
This Fund is managed by F&C Fund Management Ltd.

Objectives and investment policy

The objective is to provide capital growth.

The Manager seeks to achieve this by investing mainly in a spread of medium sized UK equities (ordinary shares in companies listed on the UK stock market) that form part of the FTSE Mid-250 ex Investment Trusts Index. The Fund may also hold investments outside of the index where the Manager feels it is appropriate.

While the Manager will invest mainly in equities, it may also invest in other investments such as derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to maintain, increase or reduce exposure to particular stocks or a relevant market index. Derivatives may also be used for efficient portfolio management.

The Manager may also invest in money market instruments (investments that deliver an investment return similar to that of cash deposits) and deposits.

Any income earned by this share class will be reinvested back into the share class to help boost the value of a share.

There is no minimum holding period for this Fund.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
