F&C US Smaller Companies Fund

Share Class: C Inc, a Fund of F&C Investment Funds ICVC II (ISIN GB00B7YDFB99).
This Fund is managed by F&C Fund Management Ltd.

Objectives and investment policy

The objective is to provide capital growth.

The Manager seeks to achieve this by investing mainly in a diversified spread of equities (ordinary shares in companies) of US smaller and medium sized companies. Typically these are companies with a market capitalisation of less than \$5bn at the time of purchase. This will normally mean that the US's largest companies by market capitalisation are excluded from the Fund.

While the Manager will invest mainly in equities, it may also invest in securities issued by the Government of the United States. The Manager may also invest in derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to hedge positions or to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities or currencies other than the Fund's accounting currency, which is sterling. The Fund does not normally hedge currency exposure.

Income is distributed annually.

There is no minimum holding period for this Fund.

You may buy or sell units on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received before 5.00pm (UK time) to receive the price calculated at the following day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.

Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
