**Europe ex UK Smaller Companies Fund**, a Sterling denominated sub fund of the Standard Life Investment Company, Platform 1 Accumulation Shares (ISIN:GB00BYMMJ932). This fund is managed by Standard Life Investments (Mutual Funds) Limited.

## Objectives and Investment Policy

The fund aims to provide long term capital growth by investing predominantly in the shares of smaller companies listed on European stock markets, excluding the UK.

The fund is actively managed by our investment team, who will select stocks to try to take advantage of opportunities they have identified.

The fund may use derivatives to reduce risk or cost, or to generate additional capital or income at low risk. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example dividend income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any normal business day.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

## Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {6} because of the extent to which the following risk factors apply:

- (a) The fund invests in equities and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- (b) The fund may invest in equities and equity related securities in European emerging markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- (c) The shares of smaller companies may be less liquid and more volatile than those of larger companies.

- (d) Investing in derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where economic exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund does not make extensive use of derivatives.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes.

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

As this fund was launched on 1/11/2007 the ongoing charges figure here is an estimate as insufficient data is currently available. The ongoing charges figure would ordinarily be based on expenses incurred in the previous calendar year. The UCITS' annual report for each financial year will include detail on the actual charges made. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

For more information about charges, please see the Prospectus which is available at [www.standardlifeinvestments.com](http://www.standardlifeinvestments.com).

Performance has been calculated over the stated period based on the share price of this share class. It does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.
